# Automatic Case Erectors

# AE-525

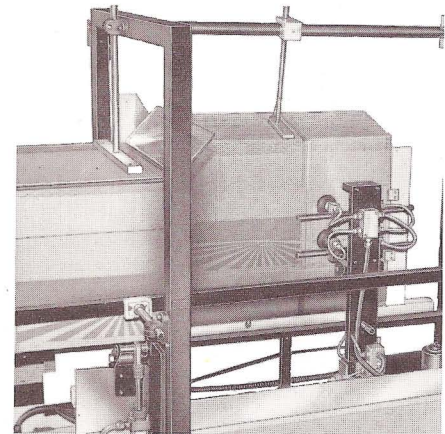

AE-525 Automatic Case Erectors eliminate the time, labour and space consuming process of erecting corrugated cartons manually.

## Operation

Lay-flat cases are stored in the machine's magazine. Each case is picked up by vacuum cups, opened and squared in the machine. All the four bottom flaps are folded as the case is pneumatically transported through the length of the machine and is delivered to the packer on an on-demand basis.

Bottom sealing attachment is also optionally available for sealing the bottom flaps lengthwise, using B.O.P.P. pressure sensitive tapes of 50 mm width.

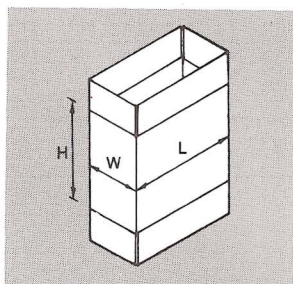

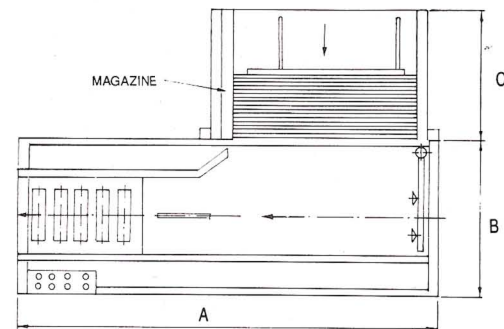

- Sturdy construction
- Totally indigenous design and components
- Inclined magazine with a capacity to hold 50 to 80 lay-flat cases
- Adequately powerful in-built vacuum pump to handle all qualities of cases
- Output speed of 6 to 10 cases per minute
- Facility to add on Roller Conveyor for outflow, On-line Marking System, Cartons Counter, etc.
- Prompt after-sales service and easy availability of spares

At present, these machines are offered in two models and accept a wide range of case sizes and qualities. Changeover to various sizes in the range can be made within a few minutes and without the use of any special tools.

## Technical Data

Compressed air requirement	: 50 Lt. at 6 bar pressure
Electrical requirement	: 415 Volts, 50 Hz supply (other voltages on request)
	Load : Basic model : 0.6 KW
	With Bottom Sealer : 0.78 KW
Configuration	: Right hand and Left hand configurations available.
Output	: 6 to 10 cases per minute depending on case size

Model	Case Dimensions (mm)			K/D Sizes (mm)	Floor Space Requirement (mm)			
	L	W	H		A	B	C	
AE-525/2	Max.	400	300	300	700 X 600	1600	600	500
	Min.	250	200	150	450 X 350			
AE-525/3	Max.	600	400	350	1000 X 750	1900	650	600
	Min.	350	250	150	550 X 350			

Special model will be offered for case sizes outside the above standard ranges.
